

Technology Multimedia Presentations

■ SRS-enabled question screens can be answered in real time when used with our ClassAct®SRS student response system.

■ Key concepts are explored in simple steps.

■ If the ClassAct®SRS system is not being used, the presentations can be accessed from an easy-to-navigate menu system.

To help teachers make the best use of their ScanTEK resources, we have created a series of theory presentations using Microsoft PowerPoint® which can be used for group presentations. Each presentation covers a specific topic and features dynamic use of graphics. The presentations also include integrated questions to test the student's understanding of each topic.

If used with our ClassAct®SRS student response system, students can use SRS keypads to answer the questions in real time and the system delivers instant assessment of all students to the teacher.

Ideally used with a computer data projector for viewing by the whole class, these presentations help the teacher deliver key concepts and ideas that relate to the ScanTEK program.

The presentation screens build up in a logical, easy-to-follow order, outlining key facts about the topic in hand. Some presentations include animations which help simplify concepts some students may have difficulty understanding.

A Technology Multimedia Presentations Manual contains a printed copy of all the presentation slides. Additional notes are included to assist the teacher with more complex topics. The manual also includes the answers to all the questions.

Presentation topic areas include:

- Alternative Energy
- Automated Transport
- Computer Control
- Electricity
- Electronic Communications
- Electronics
- Garbage Disposal
- Genetic Engineering
- Graphic Communications
- Hydraulics
- Hydroponics
- Manufacturing - Systems
- Manufacturing - Tools
- Mechanisms
- Multimedia Production
- Physical Properties of Materials
- Mechanical Properties of Materials
- Testing Properties of Materials
- Materials – Metals
- Materials – Plastics
- Pneumatics
- Problem Solving
- Structures
- Systems

Items supplied with STPP01/SRS Technology Presentations include:

- Technology Multimedia Presentations CD
- Technology Multimedia Presentations Manual

Additional Resources

- Microsoft PowerPoint® (if the presentations are to be customized).
- ClassAct®SRS system (if the question screens are to be edited).

Module Facts

For Technology Program, order as: STPP01/SRS Technology Multimedia Presentations

	No.	Average time
Presentations	32	60 minutes
Integrated Questions for ClassAct®SRS	317	
Total		32 hours
